Technical Data Sheet

iF560 Anti-Human CD279

Catalog Number: 101403, 101404

Size: 25 tests, 100 tests

Target Name: CD279, PD1, PD-1

Regulatory Status: RUO

Product Details

Clone: 279AM1 Application: FC Reactivity: Human Format: iF560

Isotype: Mouse IgG1

Antibody Type: Monoclonal

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v)

BSA

Protein Concentration: Supplied at a lot-specific concentration.

Storage&Handling: The antibody solution should be stored undiluted between 2°C and 8°C, and

protected from prolonged exposure to light. Do not freeze.

Recommended Usage: For flow cytometric staining, it is recommended to use 5 uL of this reagent per 0.5-1.0 million cells in a 100 μ L volume. Optimal reagent performance should be determined by

titration for each specific application.

Excitation Laser: Green/Yellow laser (532/561nm)

Release Date: Dec-25

Background Information

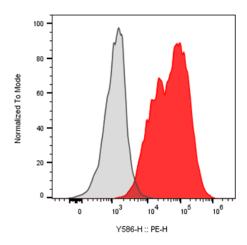

CD279, also known as Programmed cell death 1 (PD-1), cell surface receptor which binds to PD-L1 and PD-L2 ligands; functions as immune checkpoint with important role in down regulating immune system by preventing T-cell activation. Targeted by Nivolumab, Pembrolizumab and other monoclonal antibodies in a new class of cancer drugs. CD279 is expressed predominantly on activated T cells, B cells, and myeloid cells. The interaction with CD279 ligands results in inhibition of T cell proliferation and cytokine secretion.
